PROFILE (First Principles)

Aspiring Electrical Apprentice focused on **fundamentals, safety, and execution**. I believe great electricians are built from first principles: understanding how systems work, why safety matters, and doing the job properly every time. I bring hands-on installation experience, military discipline, and a strong willingness to learn from qualified tradespeople on-site. Reliable, practical, and calm under pressure.

CORE STRENGTHS

- Electrical safety mindset (lock-out, PPE, hazard awareness)
 - Hands-on installation & basic wiring exposure
 - Strong mechanical aptitude & tool handling
 - Problem-solving on site (root-cause focused)
 - Clear communication & team reliability
 - Physically fit, punctual, and consistent
-

RELEVANT EXPERIENCE

IMPACT BLINDS — Installer / Site Technician

2023 – Present - Installed motorised and manual blind systems on residential and commercial sites - Assisted with **basic electrical connections** and cable management under instruction - Read site plans, measured accurately, and executed installations efficiently - Followed strict safety procedures to protect clients, team members, and equipment - Troubleshoot on-site issues by breaking problems down to fundamentals and fixing root causes

Key Value to Electrical Trade: Real site experience, tool confidence, safety discipline, and learning from supervisors

KOREAN ARMY — Signaller / Equipment Operator

Gangwon-do | 2005 – 2007 - Maintained and operated communication and technical equipment - Followed strict safety and compliance standards under pressure - Worked in structured teams with clear command and accountability - Developed discipline, reliability, and responsibility in high-risk environments

Key Value to Electrical Trade: Safety-first mindset, discipline, teamwork, and procedural thinking

EDUCATION & TRAINING

Certificate in Electrical Pre-Trade

Manukau Institute of Technology — 2024 (*In Progress*) - Electrical theory fundamentals - Wiring principles and regulations (NZ context) - Electrical safety and compliance awareness

Web Development Certificate

ACG Yoobee School of Design — 2015 - Logical problem-solving and system thinking

TECHNICAL SKILLS

- Basic electrical systems & wiring concepts
 - Hand & power tools
 - Installation, setup, and fault identification
 - Reading instructions, diagrams, and site plans
 - Safety protocols & risk awareness
-

WORK ETHIC (What Employers Can Expect)

- Shows up on time, every day
 - Listens first, acts second
 - Learns fast and applies feedback immediately
 - Respects supervisors and works well in teams
 - Focused on becoming a **qualified, safe, and dependable electrician**
-

AVAILABILITY

Available for apprenticeship or entry-level electrical roles. Ready to start immediately and commit long-term.
